Cover Letter — "System Administrator" position

Dear Colleagues,

My name is Evgeny Gorun. I have over 25 years of experience in information technology, including more than 10 years of hands-on support and development of IT infrastructure for government institutions and commercial organizations.

My expertise spans the full IT-infrastructure management cycle: administration of Windows Server and Linux, support of Active Directory and Group Policy, virtualization on VMware, Hyper-V and Proxmox, configuration of network infrastructure based on MikroTik, Cisco and Ubiquiti, VPN deployment, and information security and backup using Veeam Backup & Replication.

I have hands-on experience supporting corporate services and business systems, including Microsoft Exchange, IIS, RDS, file servers, storage systems, 1C:Enterprise, Microsoft SQL Server, MySQL and PostgreSQL. I have implemented containerization solutions based on Docker, automated routine tasks using PowerShell, Python, Bash, SQL, VBA and REST API, and monitored infrastructure with Zabbix and Grafana.

I have taken part in projects to modernize IT infrastructure, improve fault tolerance and information security, and implement backup, access-control and personal-data-protection systems. Thanks to a combination of technical expertise and many years of working with customers, contractors and government bodies, I resolve both technical and organizational challenges effectively.

I have designed and deployed IT infrastructures using artificial-intelligence technologies and business-process automation tools.

I am confident that my experience in building and developing IT infrastructure, broad technical background and high level of responsibility will benefit your company. I would be glad to tell you more about my experience and discuss opportunities for cooperation at an interview.

Best regards, Evgeny Gorun
